

## **2016 AAIV COMPENSATION SURVEY**

### **HISTORY**

The American Association of Industry Veterinarians (AAIV) has been conducting compensation surveys since 1976. Over the years, the format and frequency has been adjusted in order to accommodate market and organizational needs, changes and interests. Data was collected between 12/2016 and 5/2017.

### **METHODOLOGY**

The survey was promoted through the AAIV website, social media channels, and via member promotion to veterinarians, via their own Linked In pages, and other industry communication methodologies. The data instrument was developed and data was collected anonymously via Survey Monkey. Once collected, data was reviewed for appropriate inclusions. Three respondents who indicated they were exclusively in private practice, who did not indicate they had a DVM degree or did not answer any questions at all in the survey were removed from the analysis. The responses from the remaining 111 respondents are included in this final report.

Due to major changes in the survey instrument, it is difficult to directly compare the past two years' data to that of previous years, however, where possible, we have done so and listed the caveats in associated footnotes.

### **COPYRIGHT AND EXLUSIVITY**

This report, all associated data, survey instrument, results and discussion are the exclusive property of the American Association of Industry Veterinarians (AAIV) and may not be copied, shared or reproduced without the express written consent of the AAIV. Data and results are available to members via their online portal on the organization website.

## HIGHLIGHTS

A total of 111 respondents were included in the results presented. Of those, 58% (64) were female and 42% (47) were male. It appears that the average salary has decreased over the past decade, with this year's mean at \$141,524 versus \$146,323 in 2015. Prior to 2015, however, the AAIIV compensation studies did not split out base salary versus bonus clearly, therefore it is difficult to compare the numbers directly. Moving forward, these two compensation numbers will continue to be tracked independently.

The majority of respondents reported to be working full time (92.8%). The majority of respondents had worked in clinical practice during their career, with only 10.8% reporting never having done so. Respondents were relatively evenly split between having worked in full-time clinical practice for 5 or fewer years (28.8%), 6-10 years (30.6%) or 11 or more years (29.7%)

Approximately one-third of respondents (34.2%) reported traveling 6 or fewer days/month (or not at all). Another 27.0% indicated that they travel 7-12 days per month.

Male respondents reported a higher average salary (\$152,521) than female respondents (\$133,324). The gap however appears to be shrinking with the difference decreasing from \$23,129 in 2015 to \$19,197 in 2016. Increasing the total number of survey respondents, especially in the younger age groups in future surveys will help to provide better detail on this trend.

Three quarters of respondents who provided salary data indicated that they do have a cash bonus program. This ranged from \$2,640 to \$200,000 with a mean of \$29,413 and a median of \$28,000 annually. The gender disparity continued with the bonus opportunity as men reported a mean of \$32,430.91 available to them while women reported a mean of \$26,703.10.

Over 87% of respondents reported that their organization had a 401K program, and of those, 90.9% indicated that they had a matching program for their 401K. The most common match was 5%. The mean was 4.81%.

As a percentage of those that responded, the majority, 57%, were very or extremely satisfied with their job. This represents 53% of the total survey respondents. It appears that male respondents were more satisfied with their jobs than female respondents with 71% of males vs. 47% of females reporting that they were extremely or very satisfied. More than 2/3 of respondents who worked out of a home office (71.1%) were Extremely or Very satisfied versus only 48.5% who worked out of a corporate office.

Work-Life balance appeared to be a general challenge for respondents with 39.6% reporting it was moderately easy versus only 14.4% reporting it was Extremely or Very easy and 21.6% reporting it was only slightly easy.

## AVERAGE SALARY SUMMARY

Previous Study Data retrieved from 2015 AAIV Compensation Report.

<b>YEAR</b>	<b>AVG SALARY</b>
1976	\$31,722

# DEMOGRAPHICS

## Gender and Age

Responses were relatively evenly split between male and female with 51.1% male and 48.9% female respondents. Respondents tended to be older rather than younger with the largest group (37.0%) in the 50-59 age range. The female respondents tended to be a little younger than the male respondents with 53.4% of female respondents aged 49 and under and only 38.3% of male respondents in that cohort.

## **Education**

There was a wide range of veterinary graduation years represented ranging from 1971 through 2015. The mean year was 1995, and the median year was 1997, which means the average respondent has been practicing veterinary medicine for 21 years. In fact, 36% of respondents had been in veterinary medicine for 26 years or more.

The majority of respondents, 51.4% reported having some sort of additional training or degree (Master's, PhD or Specialty)

## Geography

Missouri and Kansas had the largest contingent of respondents with 9% and 8.1%, respectively, likely due to the number of Animal Health companies in the local area. New Jersey had 8.1%, and Texas had 5.4%. When grouped geographically based on US Census regions, the Midwest (32.4%) and South (30.6%) had the largest number of residents.(1)

<u>In what state or U.S. Territory do you live?</u>	<u>Number</u>	<u>Percent</u>

Midwest	36	32.4 %
South	34	30.6 %
Northeast	23	20.7 %
Total	111	100.0 %

- (1) Previous AAIV surveys used a larger list of geographic regions, but due to the generally small number of total responses in these surveys, the data groups become too small for evaluation. The US Census regions will allow for comparison with other data, including those from other industries, over time as it is a standardized grouping system.

**Organizational Memberships**

Over 3/4 of respondents reported being active AVMA members (85.6%). Overall, 98.0% of respondents reported belonging to at least one of the organizations listed. Female respondents appeared more likely (29.7%) than males (19.1%) to belong to their local VMA. Additionally, 85.0% or more of each age group belonged to AVMA, while the 30 to 39-year-old cohort appeared more likely than other age groups to belong to their State VMA.

# EMPLOYMENT

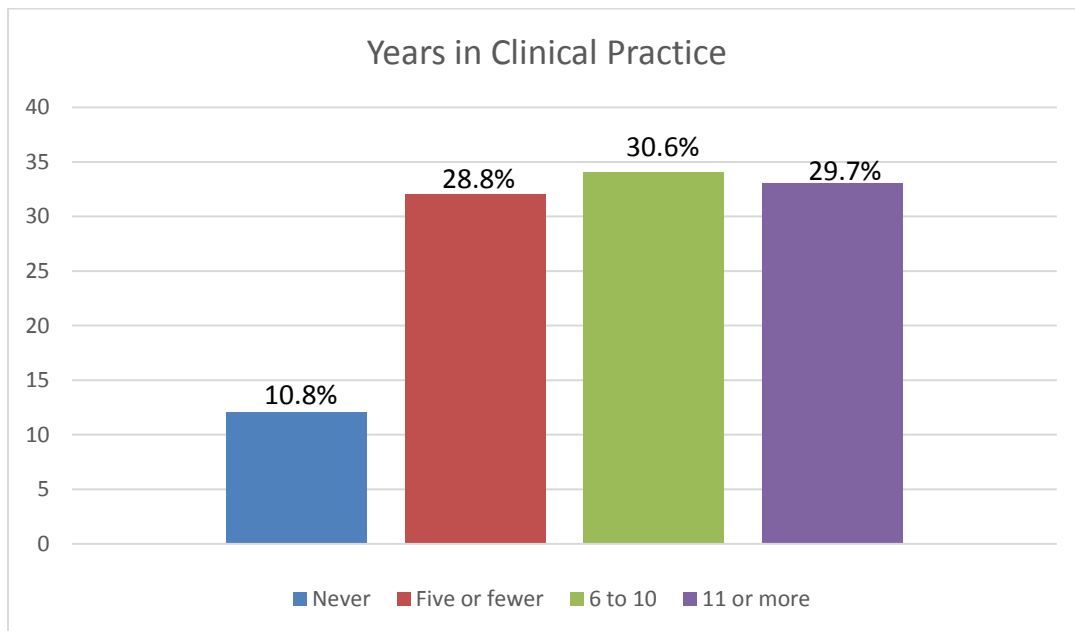

## Employment status

The majority of respondents reported to be working full time (92.8%). The majority of respondents had worked in clinical practice during their career, with only 10.8% reporting never having done so. Respondents were relatively evenly split between having worked in full-time clinical practice for 5 or fewer years (28.8%), 6-10 years (30.6%) or 11 or more years (29.7%)

Which of the following categories best describes your employment status?	Number	Percent
Employed, working full-time	103	92.8 %
Employed, working part-time	4	3.6 %
Not employed, looking for work	2	1.8 %
Not employed, NOT looking for work	1	0.9 %
Retired	1	0.9 %
Disabled, not able to work	0	0.0 %
Total	111	100.0 %

If you worked in full-time clinical practice during part of your career, for how many years did you do so?

	Number	Percent
I have never worked in full-time clinical practice	12	10.8 %
Five or fewer years	32	28.8 %
6-10 years	34	30.6 %
11 or more years	33	29.7 %
Total	111	100.0 %

## Employment Type

The majority of respondents (82.0%) reported that they were employed in the veterinary industry. Of those, the majority (86.7%) reported that their employer's primary focus area was veterinary pharmaceuticals. The majority of respondents (53.2%) reported working in Field Technical Services.

Which of the following best describes the entity you are primarily employed by?	Number	Percent
Human pharmaceuticals/devices	5	4.5 %
Contract research/testing	0	0.0 %
Government (Federal, State or Local)	1	0.9 %

# SATISFACTION

## Job Satisfaction

92.8% of respondents answered this query. As a percentage of those that responded, the majority, 57%, were very or extremely satisfied with their job. This represents 53% of the total survey respondents. It appears that male respondents were more satisfied with their jobs than female respondents with 71% of males vs. 47% of females reporting that they were extremely or very satisfied. More than 2/3 of respondents who worked out of a home office (71.1%) were Extremely or Very satisfied versus only 48.5% who worked out of a corporate office.

Overall, are you satisfied with your job, neither satisfied nor dissatisfied with it, or dissatisfied with it?	Number	Percent

**Bonus**

Three quarters of respondents who provided salary data indicated that they do have a cash bonus program. This ranged from \$2,640 to \$200,000 with a mean of \$29,413 and a median of \$28,000 annually.

<u>Does your compensation include a bonus?</u>	<u>Number</u>	<u>Percent</u>
Yes	86	84.3 %
No	16	15.7 %
Total	102	100.0 %

Missing Cases = 9  
Response Percent = 91.9 %

What is your target bonus amount (in dollars)?

Minimum = 2640  
Maximum = 200000  
Mean = 29413.03  
Median = 28000

Valid Cases =93  
Missing Cases =18  
Response Percent = 83.8%

---

### **Bonus by gender**

The gender disparity continued with the bonus opportunity as men reported a mean of \$32,430.91 available to them while women reported a mean of \$26,703.10.

#### Male respondents

What is your target bonus amount (in dollars)?

Minimum = 5000

Maximum = 200000

Mean = 32430.91

Median = 29300

Valid Cases =44

Missing Cases =3

Response Percent = 93.6%

#### Female respondents

What is your target bonus amount (in dollars)?

Minimum = 2640

Maximum = 78000

Mean = 26703.10

Median = 25000

Valid Cases =49

Missing Cases =15

Response Percent = 76.6%
